Forecast for Tuesday 22 Sep 2020

Weather: Early mist, fog and low cloud will slowly clear during the morning to give some bright or sunny spells by mid-morning. However, it will gradually cloud over from the west to bring some outbreaks of showery rain during the evening period. Winds will be increasing from the southwest, especially across the summits.

Chance of cloud free mountain/hill tops above 600m: 10% chance during the morning, with cloud bases down to 300-400m. Lifting to above the summits mid-morning, before lowering to 300-400m in cloud and rain by the evening.

Visibility: Poor at first in mist, fog and low cloud, with distant hills obscurbed from view. Briefly improving to good by mid-morning, before deteorating to moderate or poor in cloud and showery rain by the evening.

Forecast for Wednesday 23 Sep 2020

Weather: A band of cloud and rain, locally heavy, will slowly move southeastwards overnight and into the morning. The cloud and rain should clear to the east by mid-morning, with drier, brighter and colder conditions following on behind into the afternoon and evening. Feeling colder than of late, especially in the wind across the summits.

Maximum wind: Southwesterly 15-20mph, gusting 25-30mph at first, becoming north to northwesterly at 10-15mph, with occasional gusts up to 20mph.

Chance of cloud free mountain/hill tops above 600m: 0% chance during the morning, with cloud bases down to 400-500m in rain. Lifting to above the summits from midday.

Visibility: Poor in low cloud and rain first thing, improving to good for the afternoon, with distant hills clearly visible.

Temperature: **Valleys:** Plus 13 Celsius, becoming Plus 08 Celsius
At 600m: Plus 09 Celsius, becoming Plus 04 Celsius.
Freezing level: Above the summits.
